
Real Or Fake Tree?

Christmas is almost here, and people are getting their trees ready to go. Decorations, cookies, and more.

But what trees do people get? Here are two opinions.

RYAN SAYS: "I think that real trees are better because when you do not like your fake tree, you throw it away, and it does not go away in a landfill. Real trees smell stronger and good. Do fake trees smell good? No. You can pick the size of your tree. It can be 12 feet, or 2 feet! Getting real trees is a tradition. You get to pick the kind of tree you want. Your tree is disposable. It does not take up room in the other seasons."

JONAS SAYS: "I believe that artificial trees are better because you can buy one and never need to buy a new one, because they will not rot. Also, you can choose any color of tree if it's artificial! Real trees may seem cool, but they are more expensive. Don't forget, if you want a real tree, but it's too expensive, or it will rot, buy an artificial tree that looks very real. Artificial trees are sweeping the nation."
